

4.0 HARVESTER HEADS

TH60 | TH70 | TH80

HARVESTER HEADS 4.0

The model numbers of the 4.0-series heads have been updated, but the size classes remain the same. They feature four movable delimbing knives. All TH 4.0 harvester head models now have renewed hydraulics. The models received numerous improvements, for example hose routing, optimization of the sawbox cutting angle, and increased tank capacities.
